Concepts

This guide will cover the steps involved in creating rounds for canvassing.
Rounds are organised as follows.

Round Profile

This is the full set of Rounds for an Area (e.g. Ward).

These should relate to a specific set of activity, e.g. you may have a Round Profile for Canvassing, one for Leafleting

You can only have one Round Profile active for an Area at a time.

Rounds

Each Round is a coherent sub-set of an Area, usually consisting of multiple streets and/or buildings.

Stages

Each Stage is a consecutive set of some or all of the addresses on a street or in a building.

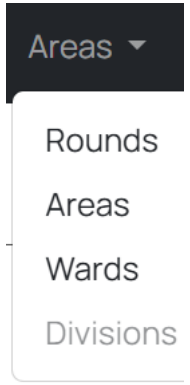
Setting up Round Profiles

©TTW Digital Limited 2025

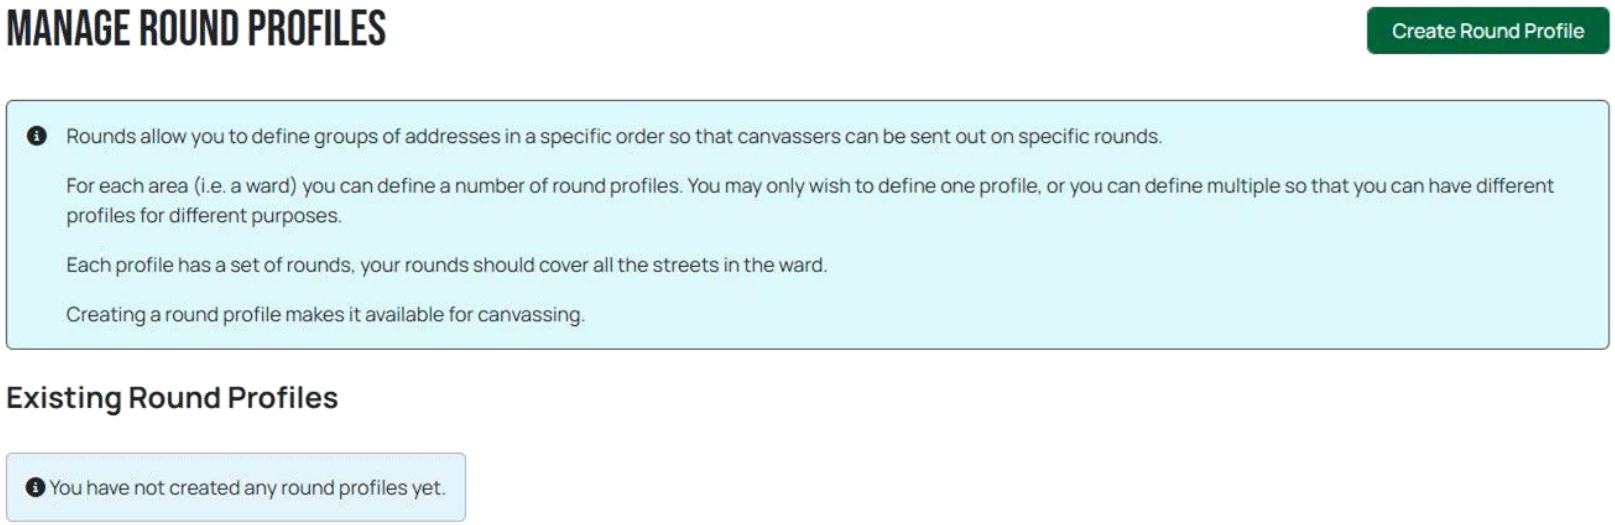
TTW Digital

Create the first Round Profile (1)

Select the **Rounds** from the **Areas** menu



Select **Create Round Profile**



©TTW Digital Limited 2025

TTW Digital

Create the first Round Profile (2)

To create the Round Profile

- Select the area (Ward) that it applies to
- Enter a suitable description of the purpose of the Round Profile, e.g. Canvassing.

Home / Round Profiles / Create Round Profile

CREATE ROUND PROFILE

Profile Area

St Marks And Seething Wells

Profile Name

Canvassing

Create your first Round Profile (3)

Initially, you will be presented with the basic information about the Round Profile

- Area (Ward)
- Name: can be edited
- Status
  - Initially Inactive
  - Select “Activate” to make it visible to Users
- Rounds
  - Initially empty
  - Select “+ Add Round” to start your first Round
- Number of addresses that are not yet assigned to Rounds

Edit or Duplicate a Round Profile

Existing Round Profiles

1 round profile configured

Area Name	Profile Name	Status	Actions		
Gipsy Hill	Example Round Profile	Inactive	Edit	Duplicate	Delete

Once you have a Round Profile created, you can

- **Edit** the Profile to adjust the Rounds within that Profile
- **Duplicate** the Profile, to use as the basis for e.g. a Filtered Round
- **Delete** the Profile – note this is irreversible

Breaking down a Round into Stages

You may already have Rounds, Walks etc. defined, in which case you can proceed to the next slide.

If you do not yet have Rounds or Walks defined, then work out the route you would want to take, and the order of the addresses, e.g.

- Brownlow Road has
  - Numbering: 1-30, with Odds on one side and Evens on the other side
  - 1 building “Brownlow Heights” on the Odds side between 17 and 19 Brownlow Road (but without a specific street number itself)
  - A cul-de-sac “Brownlow Close” numbered consecutively 1-8, on the Evens side between 20 and 22 Brownlow Road

To create a walk that starts at 1, proceeds down the Odds side until the end, and then proceeds from 30 back down the Evens side to finish opposite 1, would translate into the following Stages

1. Odd Numbers from 1 to 17 Brownlow Road
2. All flats in Brownlow Heights
3. Odd Numbers from 19 to 29 Brownlow Road (end of Road)
4. Even Numbers from 30 to 22 Brownlow Road
5. Brownlow Close 8 to 1
6. Even Numbers from 20 Brownlow Road to 2 Brownlow Road

TTW Digital

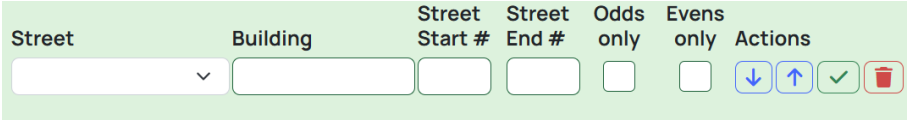
Create Stages (1) Streets

- Select a Street Name
- Do not enter a Building
- Enter a Start Number
- Enter an End Number
- Optionally, select “Odds only” or “Evens only”
- Click on ✓ to save the Stage



You want to	Use
Include **all** of a Street in **ascending** order	Street Name Street Start (low value) Steet End (high value)
Include **all** of a Street in **descending** order	Street Name Street Start (high value) Steet End (low value)
Include only the **odd** numbers in a range	Select “Odds only”
Include only the **even** numbers in a range	Select “Evens only”

TTW Digital

Create Stages (2) Buildings

If a Building has a Number, it will be included in a Street Stage on the basis of the Street Number for the Building e.g. ➡️

Address	Electors
11 Flat 1 Auckland Hill	1
11 Flat 2 Auckland Hill	2
11 Flat 3 Auckland Hill	2
11 Flat 4 Auckland Hill	3
11 Flat 5 Auckland Hill	2

If a Building does not have a Street Number, then it will have in the system a Street Number of 0. Buildings like this will each need to be created as a separate Stage, as follows

- Select a Street Name
- Enter a Building Name
- Enter a Start Number
- Enter an End Number

Click on ✓ to save the Stage

Example:

Street	Building	Street Start #	Street End #
Auckland Hill	Auckland Court	0	0

e.g. ➡️

Address	Electors
Auckland Court 1 Auckland Hill	1
Auckland Court 2 Auckland Hill	2
Auckland Court 3 Auckland Hill	1
Auckland Court 4 Auckland Hill	1
Auckland Court 5 Auckland Hill	2
Auckland Court 6 Auckland Hill	3

Create Stages (3) Refining

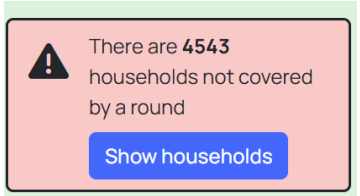
To **Edit** a Stage, click on

To **Delete** a Stage, click on

To **Change the Order**, click on

To see the current order of addresses, see the right-hand panel

To see the addresses not yet included in any Round for this Round Profile.
see the left-hand panel



To see the full list, click on

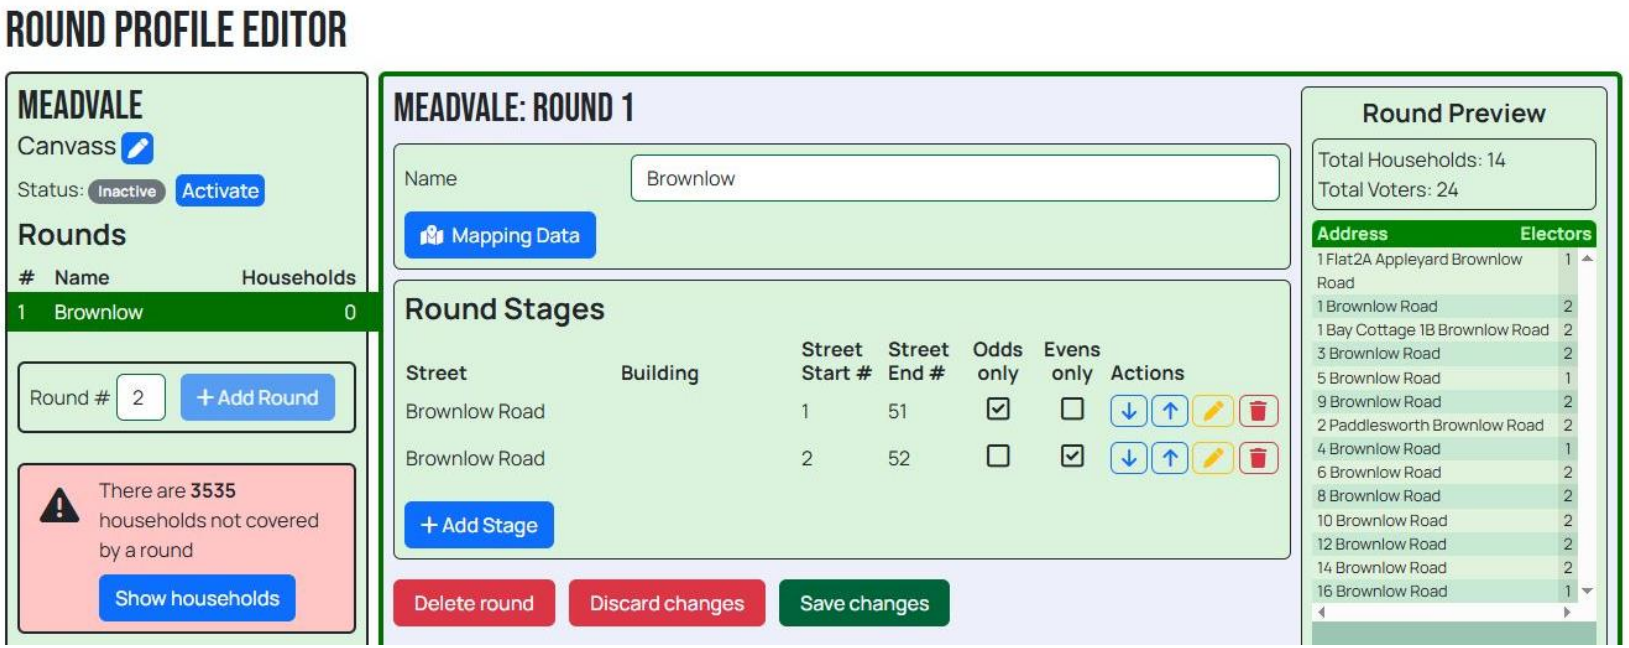
TTW Digital

Saving a Round

When the round stages have been added to a Round, the changes are saved using Save changes



You can now proceed to create further Rounds as required until the whole of the Area is covered.
