TTW Digital

Welcome!

Thanks for considering using the TTW Digital canvassing system

This guide is for local parties that are looking to get started, and takes you through the process to

- Prepare and run your first canvass session
- Roll out across your local party

Note that this is not itself a User Guide

Links out to the User Guides will be added were relevant and as they are developed

To see more, watch our Walkthrough Video

TTW Digital

Background to TTW Digital Limited

In early 2022, a group of volunteers drawn from over twenty Local Parties came together to work with the national party to deliver secure, scalable, compliant canvassing tools.

Following hundreds of hours of volunteer time, the canvassing software was as complete as the volunteer team could get it without further input from the national party - this included a successful pilot (in a by-election in Camden) in summer 2023.

At this point, the national party requested the work be paused.

This pause was periodically reconfirmed by the national party through to the beginning of this summer, at which point the volunteer team was also informed by the national party that it would not be able to make its own canvassing software available for the May 2026 election campaigns.

On that basis, a sub-group of the original volunteer team set up TTW Digital Limited to complete the work required to make that secure, scalable, compliant, low-cost canvassing software available to the whole party, as we believe this is the most effective contribution we can make to the Green Party to help it achieve the best possible results in the May 2026 elections.

Views from Users

"Using the TTW app has been an excellent addition to our canvassing operation. The tool makes it easier to log voter data, and get consistent information back from canvassers. It's helped speed up the process on the day as well as post-action data processing. I'm excited we can start using this for the Local 2026 campaign and beyond!"

Callum Fowler (candidate, St Giles target ward, Southwark)

"We've just tried out the TTW canvassing software in a group canvassing session in one of our target wards. We got our electoral roll data ready to upload on Wednesday, had it uploaded on Thursday and were out canvassing on Sunday. Our team, comprising a mix of experienced canvassers and first timers, tech-savvy and less so, were able to use the software on their smartphones straight away. It was very straightforward to view elector data for a street and enter the vital details from each conversation.

The same evening we were able to download the canvass results for us to analyse later.

We'll be looking to roll out across all of Lambeth's campaign wards as soon as we can."

Pete Johnson / Pete Elliott (Election Campaign Co-coordinators, Lambeth Green Party)

TTW Digital

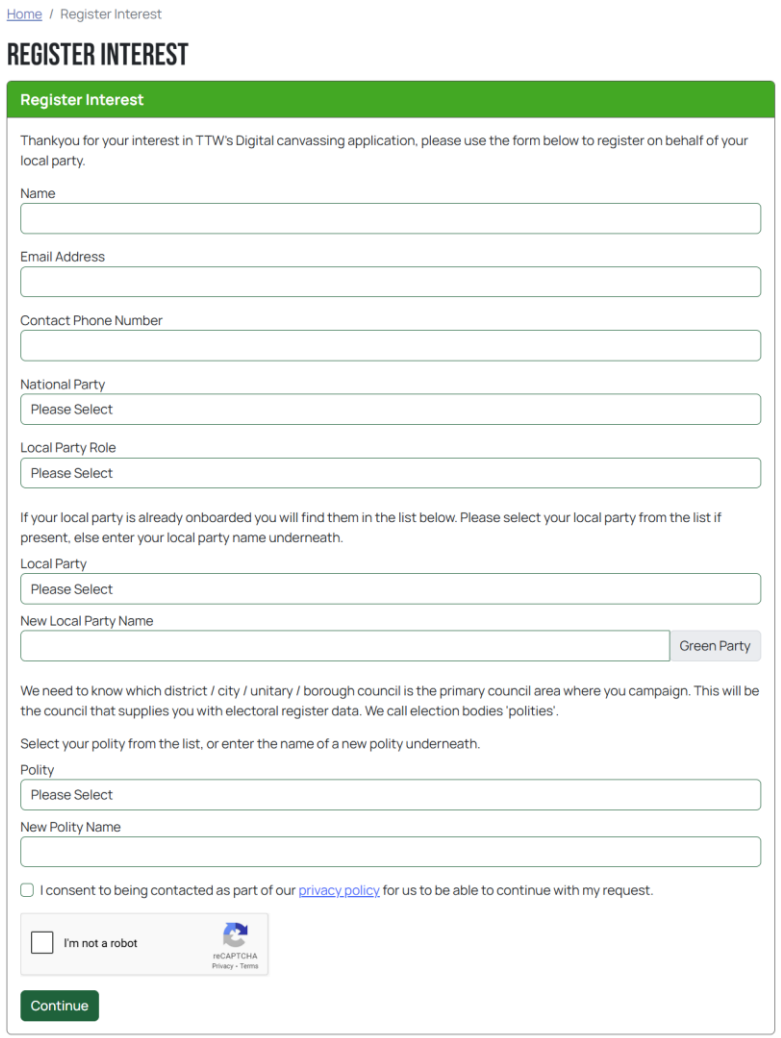
Register Interest Form

Before you can start, you need to get into our onboarding queue

- Select a representative (preferably your Data Controller) who is authorised to sign up on your local party's behalf
- Get them to complete the form here
- Join our Onboarding WhatsApp group here



Home / Register Interest

REGISTER INTEREST

Register Interest

Thankyou for your interest in TTW's Digital canvassing application, please use the form below to register on behalf of your local party.

Name

Email Address

Contact Phone Number

National Party

Please Select

Local Party Role

Please Select

If your local party is already onboarded you will find them in the list below. Please select your local party from the list if present, else enter your local party name underneath.

Local Party

Please Select

New Local Party Name

Green Party

We need to know which district / city / unitary / borough council is the primary council area where you campaign. This will be the council that supplies you with electoral register data. We call election bodies 'polities'.

Select your polity from the list, or enter the name of a new polity underneath.

TTW Digital

Pre-Reading

TTW Digital Terms of Service.pdf

- This is our contract with your authorised representative
- It includes GDPR-compliant terms for acting as a Data Processor for you
- Note that as Local Parties are “unincorporated associations”, we have to contract with an authorised representative of that association

TTW Digital End User Licence Agreement

- This is the agreement we require all Users of our service to abide by

TTW Digital Privacy Policy

- This is how we control the Personal Data of Users of the system
- Apart from essential communications, we will only contact you and your Users about changes in functionality, new user guides, training etc. (no selling!), and you and your Users can opt-out at any time
- We do not use any tracking Cookies
- We encourage all Users, and especially Local Admins, to stay signed up

TTW Digital - Security Briefing

- Data protection and security are the foundation on which we built our service, and this sets out how we deliver that to local parties

©TTW Digital Limited 2025

Recommended Preparatory Work

If you want to get started as soon as you receive our sign-up email, we recommend preparing the following

Identify at least one additional Local Admin User

Selecting at least one further initial Local Admin(s) is key to the success of the application, as they upload initial data and correct any issues, and set up Users and Rounds

- Select Local Admins carefully - they have privileged access to your data
- Make sure they read the User Guides
- Join our Local Admins mutual support WhatsApp channel (coming soon)

Identify a small number of key activists who can be your first Canvassing Users

These should be the key activists (e.g. Councillors, target ward Candidates, core campaign team members etc.) who will be involved in the initial canvass

Join our Onboarding WhatsApp channel here

©TTW Digital Limited 2025

TTW Digital

Assess your data (1) No pre-existing data

The minimum required for initial canvassing is the upload of at least a subset of your Electoral Register

- It must be uniquely yours – not shared with any other local parties

If you do not have any per-existing canvassing data at all, then you should not need to do any further data preparation – you can upload

- A section of the Electoral Register (as little or as much as you want) – the remainder can be uploaded incrementally when you are ready
- The whole Electoral Register in one go

©TTW Digital Limited 2025

Assess your data (2) Pre-Existing data (1)

If you do have any canvassing data, we can support two approaches

- Upload basic canvassing data as part of the Electoral Register upload
- Upload the Electoral Register, then use the Bulk Data Entry screens to record your canvassing data

The fields we can upload per election

- Green Voting Intention (i.e. 1-5)
- Usual Party
- Whether they voted in the election (historic election only)
- Postal voter (future election only)

If you need to do any significant cleansing or alignment of the data, then you may want to use an incremental approach

©TTW Digital Limited 2025

Assess your data (3) Pre-Existing data (2)

If your data already aligns with your Electoral Register, and with the fields the system can upload, you can upload

- A section of the Electoral Register plus any pre-existing data (as little or as much as you want) – the remainder can be uploaded incrementally when you are ready
- The whole Electoral Register plus all pre-existing data in one go

If your data includes fields the system cannot upload (e.g. last knocked date etc.), you can either

- Accept the loss of those particular fields, and load the data in as set out in the previous slide
- Load the basic Electoral Register, and then manually enter your Pre-Existing canvassing data using the Bulk Data Entry screens

See also: User Guide: C3 Electoral Register Initial Upload

We are always happy to give advice on specific cases – please contact us here

©TTW Digital Limited 2025

Responding to your invite

©TTW Digital Limited 2025

TTW Digital

Receiving Your Invitation

When we are ready, your authorised representative (the individual who completed the Register Interest form) will receive an invite email from info@ttwdigital.co.uk

- You may wish to add that address to your safe senders list to ensure it does not go into your Junk email

©TTW Digital Limited 2025

Responding to Your Invitation

To sign up, you will need to

- Set up your account. See User Guide A: User Sign-Up
- Agree to the
  - TTW Digital Terms of Service.pdf
  - TTW Digital End User Licence Agreement
  - TTW Digital Privacy Policy
- Set up a subscription (£45 per local party per month for up to 100 users – more users can be purchased for £5 per 100 user per month)
  - Debit Card
  - Credit Card
  - Direct Debit mandate

  An invoice will be issued when you sign up and each month thereafter
- All this is managed through our automated onboarding process
  - Note you must sign up using a Credit or Debit card, but after you have signed up you can switch to using a Direct Debit for future months' payments

©TTW Digital Limited 2025

Prepare for your first canvass session

©TTW Digital Limited 2025

TTW Digital

Start Canvassing in 5 Steps

By following these steps (and if your data is ready), you can start canvassing within an hour of signing up

1. Set up at least one Ward – see User Guide C1: Party Management

2. Select/add at least one future Election, and any historical elections for which you have data – see User Guide C1: Party Management

3. Upload your Electoral Register (including additional Canvassing data if mapped into the Electoral Register file) – see User Guide C3: Electoral Register Initial Upload

4. Assign the Polling District(s) to the Ward – see User Guide C1: Party Management

5. Optionally, add some Canvassing Users (suggest 2-4) and get them signed up – see
   - User Guide C2: User Management
   - User Guide A: User Sign-Up

Start Canvassing – it really is that simple!

©TTW Digital Limited 2025

Initial load of the Electoral Register

Although you can load the data straight into the Live service, we would nevertheless recommend that steps 1 to 4 are checked in our Sandbox environment, to

- Check that the data uploads correctly
- Check you can see the uploaded data in the Canvassing Screens as expected
- Ask us any questions about the data load and raise any issues

For the

- First parties to onboard, we will directly support you with the set up and load into our Sandbox environment
- Parties onboarding later will be able to check this directly in the Sandbox environment

Note that

- Data uploaded to our Sandbox environment is deleted every day at midnight
- We will make a Sandbox environment available to all local parties in due course

©TTW Digital Limited 2025

First canvass session

Agree which Streets you are going to Canvass, and whether you are doing that individually, in pairs etc.

If you have multiple people working a Street, the “Already Knocked” alerts will mean you won’t accidentally knock the same door twice

If you want reassurance, print out copies of the relevant Streets, but note that this isn’t strictly necessary unless you know that mobile phone coverage is patchy (a canvasser without the App can buddy up with a User who can then run the board using the App)

- See User Guide: <ADD>

©TTW Digital Limited 2025

Scaling Up

©TTW Digital Limited 2025

TTW Digital

Scaling Up (1) Preparation

Set Up Local Admins

Local Admins are key to the success of the application, as they set up Users, Rounds and (soon) Action Days, plus they can correct data issues and download data for analysis

- Select Local Admins carefully - they have privileged access to your data
- Get them signed up as Users (see “Invite Key Activists to be Users”, below)
- Once they are set up, raise a support request for them to be elevated to Local Admins
- Make sure they read the User Guides
- Join our Local Admins mutual support WhatsApp channel (coming soon)

Load Remaining Data

- If you’ve chosen to upload data incrementally, you should work through loading each increment until you at least have all your Target wards loaded

©TTW Digital Limited 2025

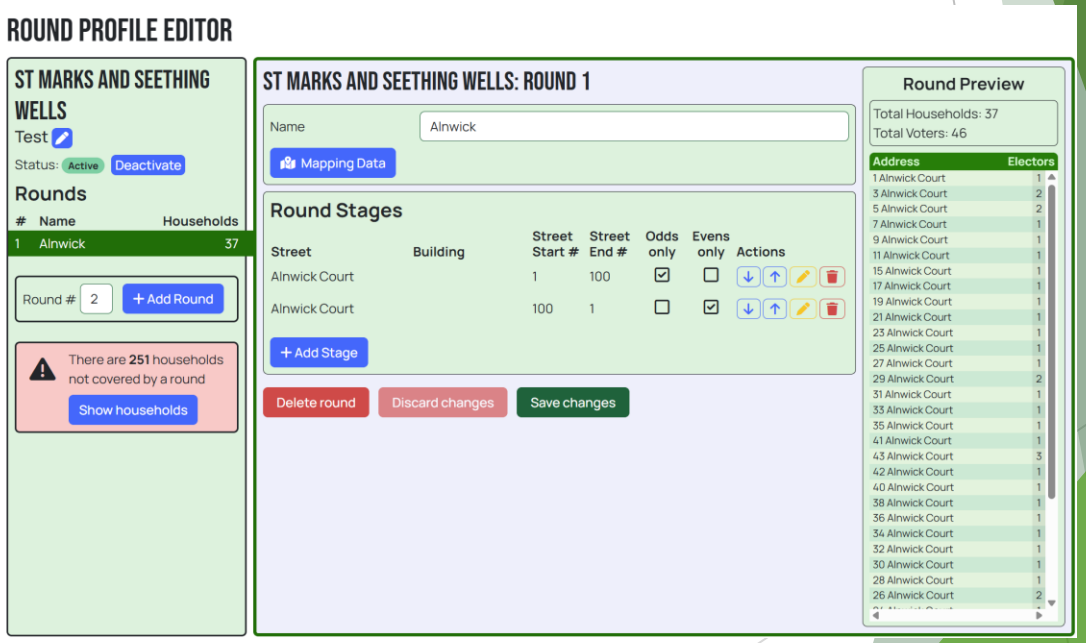
Scaling Up (2) Set up Rounds

- The default display of addresses is simply the alphabetical order of the Streets in a Ward and the numerical order of the houses within a Street

- While this is fine for initial canvassing by experienced canvassers, for canvassers unfamiliar with the area it's really helpful to be guided through a specific route

- This is why it is worth taking the time to set up Rounds to define specific subsections of a Ward and the route within that subsection – see User Guide C4: Setting up Rounds

- If you make it a rule that you set up Rounds where needed ahead of each canvassing session, you will find that very quickly you have whole wards fully covered



©TTW Digital Limited 2025

TTW Digital

Scaling Up (3) Invite Key Activists

Some key activists (e.g. Councillors, target ward Candidates, core campaign team members etc.) will be canvassing frequently and can be trusted to have ongoing access to the ability to canvass

Options

- Get a Local Admin can create their accounts directly in the App
  - This sends them a sign-up email

  and/or
- Get them to register interest here
  - A Local Admin can confirm their request in the App as a “Canvassing” User

- See User Guides:
  - User Guide C2: User Management
  - User Guide A: User Sign-Up

©TTW Digital Limited 2025

Scaling Up (4) Set up Action Days

Users who don't frequently canvass should be set up as "Action Day" (rather than "Canvassing") Users.

This allows you to give controlled access to canvassing data to those Users.

Access is controlled through setting up Action Days, which specify an Area (Ward), date and time window in which Action Day Users have access to canvassing data.

Initially, only Action Day Users in your local party can access these Action Days.

Going forward, we will be bringing in functionality to allow you to

- Offer access to Action Day Users in other local parties;
- Add filters to ensure that canvassing is focused on specific target voter groups.

See: User Guide C5: Action Days

©TTW Digital Limited 2025

Scaling Up (5) Demo the App

People like it when they see it - so organise a quick demo at your next Members meeting

- Optionally, show
  - Canvassing demo video
  - Video clips from Users
  - Sign up video

- Consider getting Users to fill in the Interest Registered form at the meeting here

- If a Local Admin is ready to authorise, you can complete the sign-up process in the meeting

See:

- User Guide C2: User Management
- User Guide A: User Sign-Up

©TTW Digital Limited 2025

Scaling Up (6) Invite Other Users

Other members and supporters will only be canvassing at Action Days, and so you will want to limit their access to the data to those days and areas you select

- This is the default User type

Options

- A Local Admin can create their accounts directly in the App
  - This sends them a sign-up email

  and/or
- Get them to register interest here
  - A Local Admin can confirm their request in the App as an “Action Day” User

See

- User Guide C2: User Management
- User Guide A: User Sign-Up

©TTW Digital Limited 2025

Getting the most out of the App

©TTW Digital Limited 2025

TTW Digital

Use Filters

You can filter who you canvass based

- Minimum days since last knocked
- Minimum days since last answered
- Date added to register
- Green Voting Intention
- Usual Party
- Voted in Previous Election
- Postal Voter

This supports, for example

- Focusing on high propensity voters
- Focusing on postal voters
- Persuading GVI 3 voters
- Squeezing non top-two Usual Party voters

©TTW Digital Limited 2025

Use the Data

This app isn't itself a Reporting and Analysis system

- We therefore enable (only) your Local Admins to download all your data as .csv file so you can analyse it using whatever applications you prefer (e.g. Excel, Google Sheets etc.) - get that data working for your local campaigns!

- Join our Data Analysts mutual support WhatsApp channel here.

©TTW Digital Limited 2025

Areas under development

We aim to add these in future versions

©TTW Digital Limited 2025

TTW Digital

Current Pipeline

These will be developed and included as part of your current monthly subscription, in roughly this order

- Electoral Register Update: Feb-25
  - Incremental: in progress
  - Annual: in progress
- Get Out the Vote: Feb-26

©TTW Digital Limited 2025

Possible future functionality

There are lots of things we could develop to enhance the system – here's some ideas

- Nationally accessible Action Day calendar and sign-up
- Dashboard summarising key metrics in your campaign
- Sharing data across local parties (e.g. for elections that span multiple local parties)
- Enabling local parties to manage more than one Electoral Register
- Recording information about new residents

We are proposing

- Periodically running a poll of local parties to determine the most in-demand requirements
- For the top couple of requirements, estimate the cost to develop
- Run a "crowdfunding" style model to fund the development
- Develop it and make it available to everyone

Example

- Lots of local parties tell us they want a Campaign Dashboard
- We estimate it will cost £500 to develop, and 50 parties agree to pay £10 each
- We develop it and make it available to everyone

©TTW Digital Limited 2025

Help us make the App better

Thousands of hours of volunteer time has gone into getting the App live

If we can get more of the following volunteer effort, we can accelerate further development and support

- Help us support Users
  - Develop Training Guides, Videos, FAQs etc.
  - Answer queries from Local Admins
  - Moderate our WhatsApp channels

- Help us develop more functionality – we need
  - Business analysts who can write requirements (Stories)
  - Software developers experienced with (or able to quickly learn) PHP Laravel
  - Testers who can write and run tests of new functionality

Fill in this form if you would like to discuss how you can help
